

**Statement of Understanding Regarding Senior Residents in Emergency Medicine
who are taking Part I of the Certification Examination in Emergency Medicine
Offered by the American Osteopathic Board of Emergency Medicine (AOBEM)**

I understand that it is the policy of the American Osteopathic Board of Emergency Medicine (AOBEM) not to allow senior residents to continue in the progression towards certification in emergency medicine beyond the Part I examination until all residency requirements in emergency medicine have been met and I am deemed “training complete” by the American Osteopathic Association. At least half of the last year of residency must be complete at the time of sitting for the Part I examination. I will not be allowed to move on to Part II (oral portion) of the examination until I am deemed “training complete” by the American Osteopathic Association. The AOBEM cannot, and will not be held liable if for any reason my training is not approved. I also understand that I will not be considered “board eligible” until I have been deemed “training complete” by the American Osteopathic Association.

I choose to take the examination at this time and agree with the above statements.

I choose to withdraw from the examination at this time. I acknowledge that I was informed that I would be presented with this waiver and required to sign it prior to taking Part I of the certification process. I understand that I must contact the AOBEM office to process a refund of the examination fee.
